PROFESSIONAL SUMMARY

Operations and customer-facing professional with experience across higher education, healthcare, nonprofit administration, and laboratory environments. Skilled in analyzing complex accounts and requirements, coordinating cross-functional work, improving workflows, training colleagues, documenting processes, and communicating clearly with customers and stakeholders. Currently expanding expertise in IT product management, project management, Power BI, and applied AI. Known for high-volume execution, research-driven problem solving, accuracy, and turning complex information into practical next steps.

CORE COMPETENCIES

Project Coordination • Product & Process Thinking • Business Analysis • Process Improvement • Stakeholder Management • Customer Operations • Higher Education Operations • Financial Aid & Student Accounts • Training & Onboarding • Documentation & Knowledge Management • Compliance • Agile & Scrum • Data Analysis • Power BI • SQL • Generative AI • Salesforce • Workday • PeopleSoft • OnBase • Verint • Five9 • Microsoft 365 • Teams • SharePoint

PROFESSIONAL EXPERIENCE

Financial Solutions Advisor | University of Maryland Global Campus (UMGC) | *Jan 2024 - Present*

- Manage complex student financial and account inquiries involving FAFSA, tuition and payment plans, document verification, military and veteran education benefits, employer tuition assistance, and multi-source billing.
- Handle approximately 60 calls and 30 emails per day while managing 200-300 cases per month, researching account history across multiple systems and translating findings into clear customer guidance.
- Analyze 20-60 student accounts daily using PeopleSoft, Salesforce, Workday and related tools to identify discrepancies, required actions, documentation needs, and resolution paths.
- Train and support new Financial Solutions Advisors, including onboarding, resource navigation, process clarification, shadowing, mock-call preparation, and day-to-day knowledge sharing.
- Support webinars and customer education while maintaining FERPA-aware communication and accurate documentation across sensitive student and financial records.
- Contributed process-improvement recommendations adopted by the team; consistently receive strong customer feedback, including recurring 5-star survey results.

Medical Receptionist | Saxon Internal Medicine | *Oct 2023 - Jan 2024*

- Coordinated front-office workflows, patient scheduling, records, communications, and administrative follow-up in a fast-paced medical environment.
- Maintained accurate information and supported patients and clinical staff while handling confidential information and competing priorities.

Volunteer Executive Assistant | Helping Hand for Relief and Development | *Feb 2023 - Oct 2023*

- Supported nonprofit administrative operations through scheduling, coordination, document organization, communication, and follow-up on priorities and action items.
- Helped organize information and maintain continuity across routine administrative activities and stakeholder requests.

Clinical Support I | DaVita Labs | *Jan 2022 - Aug 2022*

- Supported laboratory and clinical operations in a quality-sensitive environment requiring accurate documentation, timely issue resolution, and coordination with internal teams.
- Applied attention to detail and process discipline when reviewing information and supporting operational requests.

SELECTED IMPACT & PORTFOLIO HIGHLIGHTS

- **Workflow Improvement:** Identified recurring operational friction, organized findings, and proposed a practical process improvement that was adopted by the team.
- **Training & Enablement:** Helped onboard and support approximately five new advisors by translating complex procedures into usable guidance and reinforcing where to locate authoritative information.
- **High-Volume Case Management:** Balance speed, accuracy, research, documentation, and customer communication across hundreds of monthly cases and multiple enterprise systems.
- **AI & Knowledge-Management Focus:** Developing approaches for searchable, centralized job aids and AI-assisted resource discovery to reduce time spent locating procedures and improve consistency.
